

**LTPS**   
Long Term Power System

# Power That Lasts (And Lasts)

## A New, Maintenance-Free Power Alternative

The Long Term Power System (LTPS) from Chicago Faucets is a new way to power our line of high-performance electronic faucets. The perfect solution for any standard commercial application, the LTPS is designed to provide maintenance-free power for more than 15 years under normal use. No additional wiring, no need for an electrician, and no periodic battery replacement. Just mount the power pack, plug it into the faucet, and enjoy years of maintenance-free operation.

- **Designed to last** – 15-year power system life in most commercial applications without the need to replace a battery
- **Maintenance Free** – No replacement batteries needed; saves time + money.
- **Easy installation** – self-contained long life power system unit for easy, under-counter mounting; plugs into faucet in seconds
- **An effective alternative** to hard-wired, AC connection that eliminates additional electrical installation expense

**CHICAGO  
FAUCETS** 

Geberit Group

The LTPS is a new, long term, and maintenance-free power option for our electronic faucets and is available as a power source option for our EQ Series, HyTronic®, and E-Tronic® 40 faucets.

Below is just a partial list of available products: visit [chicagofaucets.com](http://chicagofaucets.com) to see more!

**EQ Series** The next generation of electronic faucets.

- Control box houses LTPS, solenoid, mixing valve, and supply for easy installation
- A new, affordable hands-free option for offices, retail, restaurants, and more
- Integrates electronics module, sensing eye, and aerator for a clean look
- Heavy-duty, one-piece solid brass spout for unsurpassed durability
