# ASSE 1070 Scald Protection Built In!

Certified!

**TempShield**<sup>®</sup>

TempShield thermostatic protection delivers an integrated, easy-to-install, all-in-one solution for restroom applications.

# The 410-T and 420-T Series

with integrated TempShield® ASSE 1070 compliant scald protection

## Save time. Save money. Meet code.

Now there's no need to install a separate thermostatic mixing valve below the sink. The 410-T and 420-T Series combines Chicago Faucets durability and water saving design with TempShield scald protection built right into the faucet. The result is an efficient, easy-to-install restroom faucet that complies with ASSE 1070.

- **Safety** – an integral thermostatic control element meets the ASSE 1070 standard, to help prevent scalding and deliver water at a comfortable temperature.
- **Easy Installation** – integrated scald protection eliminates the need for a separate thermostatic valve and cuts installation time in half.
- **Reliable Operation** – high quality ceramic discs are tested up to 4.5 million full motions.
- **Unsurpassed Durability** – the solid brass, chrome plated body is backed by a lifetime warranty.
- **Vandal Resistance** – tamper-proof outlet and handle help prevent vandalism.
- **Water Savings** – outlet options from 1.5 to .35 GPM help support water conservation efforts.
- **Easy Maintenance** – modular construction allows easy servicing of internal components.
